

# Veritas NetBackup Enterprise 6.5 for Operators

## COURSE DESCRIPTION

The Veritas NetBackup Enterprise 6.5 for Operators course provides the IT professional with instruction on the functionality of Veritas NetBackup (NBU) 6.5 software. This course is targeted at professionals, such as operations staff or tape librarians, who are responsible for the day to day operations associated with backups, restores and tape media management, but do not require the technical depth of a backup administrator. This course covers the general principles of using NetBackup and common daily operations. It specifically does not cover administrative tasks such as installation, configuration, and advanced troubleshooting.

### Delivery Method

Instructor-led

### Duration

Three days

### Course Objectives

This course provides instruction on Veritas NBU 6.5, and covers how to monitor your NBU Environment. At the completion of the course, you will be able to:

- Describe the function of the master, media, and EMM servers and clients.
- Use the NBU Administration Console.
- Manage tape volumes.
- Monitor backup and restore jobs.
- Perform manual backups.
- Restore files.
- Verify, duplicate, expire, and import backup images.
- Describe the function of backup policies and storage units.
- Identify the resources available for troubleshooting.
- Run NBU activity reports.
- Identify the resources available for troubleshooting.

### Who Should Attend

This course is for operators who are responsible for the day to day operation of Veritas NetBackup.

### Hands-On

This course includes practical exercises that enable you to test your new skills and begin to transfer them into your working environment.

## COURSE OUTLINE
